

Péter Bence Czaun

Software Engineer

Address:
8248, Nemesvamos, Hungary

Phone:
+36 20 286 1399

Email:
bence6811@gmail.com

Site:
peterbenceczaun.me

Technical Skills

FRONTEND TECHNOLOGIES:
Angular, TypeScript, NgRx, RxJS, HTML, CSS, SCSS, PWA, Microfrontend

BACKEND TECHNOLOGIES:
NestJS, Node.js, TypeORM, Express Microservice, Swagger, BFF

TESTING TECHNOLOGIES:
Jest, Playwright

DEVOPS & CI/CD:
Terraform, Helm, Kubernetes, Azure DevOps, Docker, Ansible, Continuous Integration/Deployment (Husky, ESLint, Prettier)

PROGRAMMING PARADIGMS:
Object-Oriented Programming, Domain-Driven Design, Facade Pattern

DEVELOPMENT PRACTICES:
Agile (Scrum), Waterfall

ADDITIONAL TOOLS:
Git, SVN, Linux, MS Office Suite, Jira, Confluence, Azure Boards

LANGUAGES:
English (C1), Hungarian (C2), German (A1)

Professional Summary

Innovative and passionate software developer with over seven years of experience in full-stack architecture, DevOps, and technological leadership. Proficient in designing and implementing scalable, secure, and maintainable applications using modern frameworks and tools. Proven ability to lead small to medium-sized teams, streamline development pipelines, and collaborate across cross-functional teams to deliver high-quality software solutions. Strong advocate for clean code, domain-driven design, and continuous integration/deployment practices.

Professional Experience

SENIOR SOFTWARE ENGINEER

Personar Hungary Kft. | 2025 – Present

- Led the design and rollout of a new cloud-native operating model from the ground up.
- Directed the migration of a complex multi-service production environment from Azure to Google Cloud.
- Established a scalable, maintainable platform foundation through infrastructure as code and deployment standardization.
- Introduced policy governance, automation, and quality gates to strengthen delivery control and platform reliability.
- Enabled long-term scalability and operational efficiency through a modernized build and release framework.
- Contributed to authentication and authorization systems, working with OAuth, SSO, and user identity management across multiple applications.

SENIOR SOFTWARE ENGINEER

Elevate Healthcare Kft. | 2019 – 2025

- Designed and developed scalable, maintainable enterprise front-end applications.
- Mentored and managed teams to ensure high-quality code and foster collaboration.
- Conducted technical interviews to evaluate candidates' skills and cultural fit.
- Coordinated with QA, design, and verification teams to align development goals with project requirements.
- Introduced tools and techniques to optimize processes and improve efficiency.
- Delivered mobile platform solutions using ORM frameworks like Swagger and TypeORM.
- Collaborated with international teams across Canada, the US, and Hungary.
- Designed and developed projects using clean architecture and domain-driven design principles.
- Contributed to web and cross-platform mobile application development with Angular and TypeScript.
- Participated in technical discussions and architectural decision-making to enhance scalability and security.

Hobbies & Interests

- Staying updated on emerging technologies and industry trends.
- Contributing to open-source projects.
- Participating in programming challenges.
- Managing a home server.

Licenses

DRIVING LICENSE:
Category B

Education

UNIVERSITY OF PANNONIA
2017 – 2021
BSc in Computer Science Engineering

Achievements:

- Second place in the University Programming Competition.
- Co-authored a scientific publication in theoretical mathematics.
- Graduated with a “very good” overall classification.

Key Achievements

- Led the implementation of scalable front-end solutions, significantly reducing development time.
- Optimized resource usage, reducing running costs substantially.
- Integrated DevOps practices into multiple projects, enhancing deployment efficiency.
- Co-led change management processes, ensuring smooth transitions with minimal downtime.
- Mentored junior and mid-level developers, many of whom advanced to senior roles.
- Directed technical teams in designing and delivering complex front-end projects.
- Facilitated successful international collaboration with teams across three countries, ensuring cultural and technical alignment.
- Optimized CI/CD pipelines, reducing deployment times and improving system reliability.
- Designed scalable architectures to facilitate easy maintenance and future-proofing.
